

# EXECUTIVE EDUCATION ADVISORY

# SUSTAINABILITY

We provide independent, research-driven advisory support to boards and senior leadership teams navigating sustainability integration, ESG governance, and strategic transformation.

We serve as a board-relevant strategic partner - combining academic rigor with executive insight to strengthen institutional capability and long-term value creation.

In today's regulatory and stakeholder environment, organizations must move beyond compliance toward strategic discipline, credible disclosure, and durable governance capability.

## OUR STRATEGIC ADVISORY FOCUS

### SUSTAINABILITY RESEARCH & STRATEGIC ALIGNMENT

Benchmark sustainability maturity, define strategic priorities, and embed sustainability into governance and operating models.

**Outcome:** A board-aligned sustainability strategy grounded in evidence and institutionalized across the organization.

### ESG GOVERNANCE & REPORTING

Strengthen ESG oversight, disclosure integrity, and assurance readiness in line with Bursa Malaysia requirements and global frameworks (GRI, ISSB, TCFD).

**Outcome:** ESG positioned as a governance capability - not an annual reporting exercise.

## Our Distinctive Approach

- Independent and research-based
- Board-focused and governance-driven
- Designed to build internal capability
- Integrated with Executive Education for sustained impact
