

SUSTAINABILITY

ESG Governance & Reporting

Define | Align | Transform

As part of Executive Education under the Sustainability Pillar, we support boards and senior leadership teams in strengthening ESG governance, disclosure integrity and reporting credibility.

Sustainability and ESG reporting are no longer compliance exercises - they are governance disciplines influencing capital access, regulatory exposure and long-term competitiveness.

Many organizations are asking:

- Is our ESG oversight aligned with enterprise risk and strategic priorities?
- Can our disclosures withstand investor, regulatory and assurance scrutiny?
- Is the board equipped with sufficient visibility over ESG risks and performance?
- Are we demonstrating measurable impact - or merely reporting activity?

Our advisory combines independent, research-based insight with structured governance analysis to strengthen oversight, enhance defensibility and support credible, standards-aligned reporting.

Organizations may engage individual modules or pursue the full advisory journey.

Our 3-Phase Approach

ESG Governance & Reporting Readiness

We assess governance structures, materiality prioritization, ESG data integrity and alignment with leading frameworks (Global Reporting Initiative, International Sustainability Standards Board, Task Force on Climate-related Financial Disclosures, Sustainability Development Goals).

Deliverables include:

- ESG Governance & Readiness Assessment
- Materiality & Strategic Priority Map
- Data Integrity & Control Gap Analysis
- Executive & Board Briefing

Outcome:

A clear, leadership-ready view of ESG maturity, exposure and assurance readiness.

ESG Reporting Design & Development

We design ESG disclosure architecture aligned with strategy, risk oversight and performance accountability. Where appropriate, we provide structured support in drafting and refining sustainability or ESG reports in collaboration with internal teams.

Deliverables include:

- ESG Disclosure Architecture Blueprint
- Key Performance Indicators & Target Alignment Framework
- Strategic ESG Narrative Framework
- Structured Report Drafting Support

Outcome:

A coherent, defensible and board-aligned ESG report.

Institutionalization & Assurance Readiness

We strengthen ESG data governance, reporting workflows and oversight routines to support consistent, year-on-year disclosure and external assurance preparedness.

Deliverables include:

- ESG Reporting Operating Framework
- Data Governance & Control Structure
- Oversight & Accountability Enhancement Plan
- Continuous Improvement Roadmap

Outcome:

ESG embedded as a governance capability - not an annual reporting cycle.

Our value proposition

We position ESG as a strategic governance capability - not a report production function. Our advisory strengthens board oversight, enhances regulatory defensibility and reduces greenwashing risk while building internal capability rather than outsourcing compliance.

Through integration with Executive Education, insights are not only delivered but institutionalized across leadership and board practice.

Expert delivery

Our advisory engagements are delivered by an experienced team and guided by sustainability governance and ESG reporting specialists. This ensures that our methodologies, recommendations, and outputs align with board-level expectations, Bursa Malaysia sustainability disclosure requirements, and leading global ESG frameworks and standards.
